Dedicated

to

My Parents, Son, Daughter

and

My beloved wife

In his teaching career since 1992 Ashish Arora personally mentored more than 10000 IITians and students who reached global heights in various career and profession chosen. It is his helping attitude toward students with which all his students remember him in life for his contribution in their success and keep connections with him live. Below is the list of some of the successful students in International Olympiad personally taught by him.

NAVNEET LOIWAL	***International GOLD Medal in IPhO-2000 at LONDON***, Also secured **AIR-4** in **IIT JEE 2000** PROUD FOR INDIA : Navneet Loiwal was the first Indian Student who won first International GOLD Medal for our country in International Physics Olympiad.
DUNGRA RAM CHOUDHARY	**AIR-1** in **IIT JEE 2002**
HARSHIT CHOPRA	***National Gold Medal in INPhO-2002*** and got **AIR-2** in **IIT JEE-2002**
KUNTAL LOYA	A Girl Student got position **AIR-8** in **IIT JEE 2002**
LUV KUMAR	***National Gold Medal in INPhO-2003*** and got **AIR-3** in **IIT JEE-2003**
RAJHANS SAMDANI	***National Gold Medal in INPhO-2003*** and got **AIR-5** in **IIT JEE-2003**
SHANTANU BHARDWAJ	***International SILVER Medal in IPhO-2002 at INDONESIA***
SHALEEN HARLALKA	***International GOLD Medal in IPhO-2003 at CHINA*** and got **AIR-46** in **IIT JEE-2003**
TARUN GUPTA	***National GOLD Medal in INPhO-2005***
APEKSHA KHANDELWAL	***National GOLD Medal in INPhO-2005***
ABHINAV SINHA	***Hon'ble Mension Award in APhO-2006*** **at** ***KAZAKHSTAN***
RAMAN SHARMA	***International GOLD Medal in IPhO-2007*** **at** ***IRAN*** and got **AIR-20** in **IIT JEE-2007**
PRATYUSH PANDEY	***International SILVER Medal in IPhO-2007*** **at** ***IRAN*** and got **AIR-85 in IIT JEE-2007**
GARVIT JUNIWAL	***International GOLD Medal in IPhO-2008*** **at** ***VIETNAM*** and got **AIR-10** in **IIT JEE-2008**
ANKIT PARASHAR	***National GOLD Medal in INPhO-2008***
HEMANT NOVAL	***National GOLD Medal in INPhO-2008*** and got **AIR-25** in **IIT JEE-2008**
ABHISHEK MITRUKA	***National GOLD Medal in INPhO-2009***
SARTHAK KALANI	***National GOLD Medal in INPhO-2009***
ASTHA AGARWAL	***International SILVER Medal in IJSO-2009*** **at** ***AZERBAIJAN***
RAHUL GURNANI	***International SILVER Medal in IJSO-2009*** **at** ***AZERBAIJAN***
AYUSH SINGHAL	***International SILVER Medal in IJSO-2009*** **at** ***AZERBAIJAN***
MEHUL KUMAR	***International SILVER Medal in IPhO-2010*** **at** ***CROATIA*** and got **AIR-19** in **IIT JEE-2010**
ABHIROOP BHATNAGAR	***National GOLD Medal in INPhO-2010***
AYUSH SHARMA	***International Double GOLD Medal in IJSO-2010*** at ***NIGERIA***
AASTHA AGRAWAL	***Hon'ble Mension Award in APhO-2011*** at ***ISRAEL*** and got **AIR-93** in **IIT JEE 2011**
ABHISHEK BANSAL	***National GOLD Medal in INPhO-2011***
SAMYAK DAGA	***National GOLD Medal in INPhO-2011***
SHREY GOYAL	***National GOLD Medal in INPhO-2012*** and secured **AIR-24** in **IIT JEE 2012**
RAHUL GURNANI	***National GOLD Medal in INPhO-2012***
JASPREET SINGH JHEETA	***National GOLD Medal in INPhO-2012***
DIVYANSHU MUND	***National GOLD Medal in INPhO-2012***
SHESHANSH AGARWAL	***International SILVER Medal in IAO-2012 at KOREA***
SWATI GUPTA	***International SILVER Medal in IJSO-2012 at IRAN***
PRATYUSH RAJPUT	***International SILVER Medal in IJSO-2012 at IRAN***
SHESHANSH AGARWAL	***International BRONZE Medal in IOAA-2013 at GREECE***
SHESHANSH AGARWAL	***International GOLD Medal in IOAA-2014 at ROMANIA***
SHESHANSH AGARWAL	***International SILVER Medal in IPhO-2015 at INDIA*** and secured **AIR-58** in **JEE(Advanced)-2015**
VIDUSHI VARSHNEY	***International SILVER Medal in IJSO-2015 at SOUTH KOREA***
AMAN BANSAL	**AIR-1 in JEE Advanced 2016**
KUNAL GOYAL	**AIR-3 in JEE Advanced 2016**
GOURAV DIDWANIA	**AIR-9 in JEE Advanced 2016**
DIVYANSH GARG	***International SILVER Medal in IPhO-2016 at SWITZERLAND***
NALIN KHANDELWAL	**AIR-1 in NEET 2019**
MRIDUL AGARWAL	**AIR-1 in JEE Advanced 2021**

ABOUT THE AUTHOR

The complexities of Physics have given nightmares to many, but the homegrown genius of Jaipur- Ashish Arora has helped millions of students to live their dreams by decoding it.

Newton Law of Gravitation and Faraday's Magnetic induction force apply perfectly well with this unassuming genius. A Pied Piper of students, his webportal https://www.physicsgalaxy.com, The world's largest encyclopedia of video lectures on high school Physics possesses strong gravitational pull and magnetic attraction for students who want to make it big in life.

Ashish Arora, gifted with rare ability to train masterminds, has mentored over 10,000 IITians and Medicos in his past over three decades of teaching sojourn including lots of students made it to Top 100 in IIT-JEE/JEE(Advance) including multiple times AIR-1 and many in Top-10. Apart from that, he has also groomed hundreds of students for cracking International Physics Olympiad. No wonder his student Navneet Loiwal brought laurel to the country by becoming the first Indian to win a Gold medal at the 2000 - International Physics Olympiad in London (UK).

His special ability to simplify the toughest of the Physics theorems and applications rates him as one among the best Physics teachers in the world. With this, Arora simply defies the logic that perfection comes with age. Even at 18 when he started teaching Physics while pursuing engineering, he was as engaging as he is now. Experience, besides graying his hair, has just widened his horizon.

Now after encountering all tribes of students - some brilliant and some not-so-intelligent - this celebrated teacher has embarked upon a noble mission to make the entire galaxy of Physics inform of his webportal PHYSICSGALAXY.COM to serve and help global students in the subject. Today students from 183 countries are connected with this webportal. On any topic of physics students can post their queries in INTERACT tab of the webportal on which many global experts with Ashish Arora reply to several queries posted online by students.

Dedicated to global students of middle and high school level, his website *www.physicsgalaxy.com* also has teaching sessions dubbed in American accent and subtitles in 87 languages. For students in India preparing for JEE & NEET, his online courses will be available soon on PHYSICSGALAXY.COM.

- Revision Checklist Videos for JEE Main & NEET
- Exam Memory Maps Videos for JEE Main & NEET

and much more...

FOREWORD

It has been pleasure for me to follow the progress Er. Ashish Arora has made in teaching and professional career. In the last about three decades he has actively contributed in developing several new techniques for teaching & learning of Physics and driven important contribution to Science domain through nurturing young students and budding scientists. Physics Galaxy is one such example of numerous efforts he has undertaken.

The third edition of Physics Galaxy provides a good coverage of various topics of Mechanics, Thermodynamics and Waves, Optics & Modern Physics and Electricity & Magnetism through dedicated volumes and many new questions included. It would be an important resource for students appearing in competitive examination for seeking admission in engineering and medical streams.

The structure of book is logical and the presentation is innovative. Importantly the book covers some of the concepts on the basis of realistic experiments and examples. The book has been written in an informal style to help students learn faster and more interactively with better diagrams and visual appeal of the content. Each chapter has variety of theoretical and numerical problems to test the knowledge acquired by students. The book also includes solution to all practice exercises with several new illustrations and problems for deeper learning.

I am sure the book will widen the horizons of knowledge in Physics and will be found very useful by the students for developing in-depth understanding of the subject.

NIT Sikkim, NIT Puducherry
Former-Member JEE Apex Board (JAB), MHRD, GoI
Former-Chairman, Central Counselling Board (CCB), AIEEE, MHRD, GoI
Former-Chairman, Direct Admission of Students Abroad (DASA), MHRD, GoI

PREFACE

For a science student, Physics is the most important subject, unlike to other subjects it requires logical reasoning and high imagination of brain. Without improving the level of physics it is very difficult to achieve a goal in the present age of competitions. To score better, one does not require hard working at least in physics. It just requires a simple understanding and approach to think a physical situation. Actually physics is the surrounding of our everyday life. All the six parts of general physics-Mechanics, Heat, Sound, Light, Electromagnetism and Modern Physics are the constituents of our surroundings. If you wish to make the concepts of physics strong, you should try to understand core concepts of physics in practical approach rather than theoretical. Whenever you try to solve a physics problem, first create a hypothetical approach rather than theoretical. Whenever you try to solve a physics problem, first create a hypothetical world in your imagination about the problem and try to think psychologically, what the next step should be, the best answer would be given by your brain psychology. For making physics strong in all respects and you should try to merge and understand all the concepts with the brain psychologically.

The book PHYSICS GALAXY is designed in a totally different and friendly approach to develop the physics concepts psychologically. The book is presented in five volumes, which covers almost all the core branches of general physics. This part of book, volume 2 covers Thermal Properties of Matter, Kinetic Theory of Gases, Thermodynamic Laws, Specific Heats of Gases, Oscillations & Waves. These are one of the critical topics for building fundamental base in Physics. The things you will learn in this book will help in building your overall strength in the branch of thermal physics, oscillations and waves. In this book every chapter is explained in a simple, interactive and experimental way. The book is divided in the two major chapters, first chapters is covering all the applications of basic thermal physics. Third chapter involves the thermodynamic processes governed by laws of thermodynamics. In this chapter mainly gaseous systems are analyzed at different levels of understanding. Fourth chapter includes the applications of heat transfer through modes of conduction, convection and radiation with several applications including conduction before steady state and analysis of solar constant. Last two chapter at the end covers the major applications of oscillations and waves that includes the whole branch of wave applications for sound waves and waves on a string.

The best way of understanding physics is the experiments and this methodology I am using in my lectures and I found that it helps students a lot in concept visualization. In this book I have tried to translate the things as I used in lectures. After every important section there are several solved examples included with simple and interactive explanations. It might help a student in a way that the student does not require to consult any thing with the teacher. Everything is self explanatory and in simple language.

One important factor in preparation of physics I wish to highlight that most of the student after reading the theory of a concept start working out the numerical problems. This is not the efficient way of developing concepts in brain. To get the maximum benefit of the book students should read carefully the whole chapter at least three or four times with all the illustrative examples and with more stress on some illustrative examples included in the chapter. Practice exercises included after every theory section in each chapter is for the purpose of in-depth understanding of the applications of concepts covered. Illustrative examples are explaining some theoretical concept in the form of an example. After a thorough reading of the chapter students can start thinking on discussion questions and start working on numerical problems.

Exercises given at the end of each chapter are for circulation of all the concepts in mind. There are two sections, first is the discussion questions, which are theoretical and help in understanding the concepts at root level. Second section is of conceptual MCQs which helps in enhancing the theoretical thinking of students and building logical skills in the chapter. Third section of numerical MCQs helps in the developing scientific and analytical application of concepts. Fourth section of advance MCQs with one or more options correct type questions is for developing advance and comprehensive thoughts. Last section is the Unsolved Numerical Problems which includes some simple problems and some tough problems which require the building fundamentals of physics from basics to advance level problems which are useful in preparation of NSEP, INPhO or IPhO.

In this third edition of the book I have included many new questions and solutions in different exercises at practice, conceptual, numerical and advance MCQs to support students who are dependent on their self study and not getting access to teachers for their preparation.

This book has taken a shape just because of motivational inspiration by my mother in 1997 when I just thought to write something for my students. She always motivated and was on my side whenever I thought to develop some new learning methodology for my students.

I don't have words for my best friend my wife Anuja for always being together with me to complete this book in the unique style and format.

I would like to pay my gratitude to Sh. Dayashankar Prajapati in assisting me to complete the task in Design Labs of PHYSICSGALAXY.COM and presenting the book in totally new format of third edition.

At last but the most important person, my father who has devoted his valuable time in finally presenting the book in such a format and a simple language, thanks is a very small word for his dedication in building the base structure of this book.

In this third edition I have tried my best to make this book error free but owing to the nature of work, inadvertently, there is possibility of errors left untouched. I shall be grateful to the readers, if they point out me regarding errors and oblige me by giving their valuable and constructive suggestions via emails for further improvement of the book.

CONTENTS

Chapter 1 ***Heat and Thermal Expansion*** **1-48**

1.1 Heat and Temperature **2**
1.1.1 Thermal Partitions 2
1.2 Temperature and States of Matter **2**
1.3 Thermometry **3**
1.4 Thermal Equilibrium **5**
1.5 Thermal Expansion **6**
1.5.1 Linear Expansion 6
1.5.2 Stress in Objects Due to Thermal Expansion 7
1.5.3 Variation in Time Period of Pendulum Clocks by Thermal Expansion 8
1.5.4 Superficial Expansion 15
1.5.5 Cubical or Volume Expansion 15
1.5.6 Variation in Density of a Substance 15
1.5.7 Weight Thermometer 15
1.5.8 Isotropic and Anisotropic Expansion 16
1.6 Calorimetry **20**
1.6.1 Specific Heat and Absorption of Heat 21
1.6.2 Mechanical Equivalent of Heat 21
1.6.3 Water Equivalent of a Substance 21
1.6.4 Phase Transformation 24
DISCUSSION QUESTION 28
CONCEPTUAL MCQS SINGLE OPTION CORRECT 30
NUMERICAL MCQS SINGLE OPTIONS CORRECT 32
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 39
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 42

Chapter 2 ***Kinetic Theory of Gases and Gas Laws*** **49-91**

2.1 Postulates of Kinetic Theory of Gases **50**
2.2 Gas Laws **50**
2.2.1 Boyle's Law 50
2.2.2 Charles and Gay-Lussac's Law 51
2.2.3 Ideal Gas Law 52
2.2.4 Avogadro's Number and Avogadro Hypothesis 52
2.2.5 Dalton's Law of Partial Pressures 53
2.2.6 Different Forms of Ideal Gas Law 53
2.2.7 Real Gases and Change of Phase 53
2.3 Pressure of Air **57**
2.3.1 Barometric Relation 57
2.4 Distribution of Molecular Speeds **62**
2.4.1 Different Speeds For Molecules of a Gas 63
2.5 Pressure Exerted by a Gas **64**
2.6 Kinetic Energy of Gas Molecules **65**
2.7 Microscopic Interpretation of Temperature **66**
2.8 Degrees of Freedom and Equipartition of Energy **70**
2.9 Internal Energy of a Gas **70**
2.9.1 Degrees of Freedom and Internal Energy For Different Types of Gases 70
2.9.2 Equivalent Degrees of Freedom For a Gaseous Mixture 72
2.9.3 Mixing of Gases at Constant Volume 72

2.10 Path of Molecules and Mean Free Path **76**
2.11 Vander Walls Gas Equation **76**
2.12 Diffusion **77**
DISCUSSION QUESTION 78
CONCEPTUAL MCQS SINGLE OPTION CORRECT 79
NUMERICAL MCQS SINGLE OPTIONS CORRECT 82
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 85
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 87

Chapter 3 ***Thermodynamics Laws & Specific Heats of Gases*** **92-168**

3.1 Thermal Equilibrium and Zeroth Law of Thermodynamics **93**
3.2 First Law of Thermodynamics **93**
3.2.1 Specific Heat Capacities of Gases 93
3.2.2 Heating of a Gaseous System and Work done by a Gas 94
3.2.3 Change in Internal Energy of a Gas on Heating 94
3.3 State of a Gas and Indicator Diagram **97**
3.3.1 Properties of an Indicator Diagram 97
3.3.2 State Variable and Path Variables 98
3.3.3 Cyclic Processes 98
3.3.4 Positive and Negative Cycles 99
3.4 Molar Specific Heats of a Gas **105**
3.4.1 Molar Heat Capacity at Constant Volume (CV) 105
3.4.2 Molar Heat Capacity at Constant Pressure (CP) 106
3.4.3 Ratio of Heat Capacities of a Gas 107
3.4.4 Ratio of Specific Heats for a Mixture of Gases 107
3.5 Different Type of Thermodynamic Processes **112**
3.5.1 Isochoric or Isometric Process 112
3.5.2 Isobaric Process 113
3.5.3 Isothermal Process 114
3.5.4 Adiabatic Process 116
3.6 Free Expansion of a Gas **121**
3.7 Polytropic Process **127**
3.7.1 Standard Processes as a Special Case of Polytropic Process 128
3.7.2 Indicator Diagram For a Polytropic Process 129
3.8 Second Law of Thermodynamics **134**
3.8.1 Reversible Processes 134
3.8.2 Heat Engines 135
3.8.3 Thermal Efficiency of a Heat Engine 135
3.8.4 Refrigerators 136
3.8.5 Statement of Second Law of Thermodynamics 136
3.8.6 Carnot Cycle 136
DISCUSSION QUESTION 144
CONCEPTUAL MCQS SINGLE OPTION CORRECT 146
NUMERICAL MCQS SINGLE OPTIONS CORRECT 152
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 156
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 159

Chapter 4 ***Heat Transfer*** **169-216**

4.1 Conduction of Heat **170**
4.1.1 Analysis of Heat Conduction in Steady State 171

4.1.2 Heat Transfer Before Steady State 172
4.1.3 Thermal Resistance and Ohm's Law in Thermal Conduction 172
4.2 Convection of Heat **180**
4.3 Radiation of Heat **182**
4.3.1 Prevost Theory 182
4.3.2 Kirchhoff's Law 182
4.3.3 Stefan Boltzmann Law 183
4.3.4 Solar Constant 183
4.4 Newton's Law of Cooling **187**
4.4.1 Average Form of Newton's Law of Cooling 188
4.5 Black Body Radiation Spectrum **192**
4.5.1 Plank's Radiation Theory as a Proof of Wein's Law and Stefan Boltzmann's Law 193
4.5.2 Practical Applications of Kirchhoff's Law 194
DISCUSSION QUESTION 196
CONCEPTUAL MCQS SINGLE OPTION CORRECT 197
NUMERICAL MCQS SINGLE OPTIONS CORRECT 200
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 208
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 211

Chapter 5 ***Oscillation and Simple Harmonic Motion*** **217-291**

5.1 Periodic Motion and Oscillations **218**
5.1.1 Types of Oscillations 218
5.2 Simple Harmonic Motion **218**
5.2.1 Representation of SHM 218
5.2.2 Equation of SHM 219
5.2.3 General Equation of SHM 219
5.2.4 Velocity and Acceleration of a Particle in SHM 220
5.3 Superpositions of Simple Harmonic Motions **223**
5.3.1 Superposition of Same Frequency SHMs 223
5.3.2 Superposition of Different Frequency SHMs 224
5.4 Analysis of Angular SHM **224**
5.5 How to Find Time Period of SHM **225**
5.5.1 Steps to Find Angular Frequency or Time Period of SHM 225
5.6 Different Types of Pendulums **226**
5.6.1 Simple Pendulum 226
5.6.2 Spring Block Pendulum 227
5.6.3 Compound Pendulum 227
5.6.4 Torsional Pendulum 227
5.6.5 Equivalent Length of a Simple Pendulum 228
5.7 Phase Analysis of a Particle in SHM **234**
5.7.1 Phase Difference in Two SHM 234
5.7.2 Same Phase and Opposite Phase SHMs 235
5.8 Energy of a Particle in SHM **244**
5.8.1 Energy of Oscillation in Angular SHM 245
5.9 Energy Method to Find Frequency of SHM **245**
5.10 Taylor's Method to Find Angular Frequency of a Particle in SHM **252**
5.11 Equation of SHM With Shifting of Origin **254**
5.12 SHM of Free Bodies in Absence of External Forces **256**
DISCUSSION QUESTION 261
CONCEPTUAL MCQS SINGLE OPTION CORRECT 262
NUMERICAL MCQS SINGLE OPTIONS CORRECT 265
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 274
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 279

Chapter 6 *Waves* **292-394**

6.1 Properties of a Mechanical Wave **293**
6.1.1 Different Types of Mechanical Waves 293
6.2 Equation of a Simple Harmonic Wave **293**
6.2.1 Velocity and Acceleration of a Medium Particle in Wave Propagation 295
6.2.2 Phase Difference and Path Difference of Medium Particles in Simple Harmonic Wave 295
6.3 Sound Waves **296**
6.4 Velocity of a Wave **301**
6.4.1 Wave Speed of Transverse Waves on a Stretched String 301
6.4.2 Wave Speed on a Stretched String from Newton's Second Law 302
6.4.3 Velocity of Sound/Longitudinal Waves in Solids 302
6.4.4 Wave Velocity of Longitudinal Waves in Fluid/Gas 303
6.4.5 Newton's Formula for Velocity of Sound in Gases 303
6.4.6 Laplace Correction 304
6.4.7 Effect of Temperature on Velocity of Sound 305
6.4.8 Effect of Pressure on Velocity of Sound 305
6.4.9 Effect of Humidity on Velocity of Sound 305
6.4.10 Effect of Wind on Velocity of Sound 305
6.4.11 Velocity of Longitudinal Waves in a Slinky Spring 305
6.4.12 Velocity of Torsional Waves in a Rod 306
6.4.13 Surface Waves in a Liquid 306
6.5 Principle of Superposition **310**
6.5.1 Application of Principle of Superposition of Waves 311
6.6 Interference of Waves **311**
6.6.1 Analytical Treatment of Interference of Waves 312
6.6.2 Interference of two Coherent Waves of Same Amplitude 312
6.6.3 Condition on path difference at the point of interference 313
6.7 Intensity of Wave **313**
6.7.1 Wave Intensity in Interference 314
6.7.2 Power of a Wave and Wave Energy Density of a Transverse Wave 314
6.7.3 Quincke's Tube 316
6.7.4 Seebeck's Tube 316
6.8 Compression Waves **322**
6.9 Spherical and Cylindrical Waves **323**
6.9.1 Intensity of Spherical and Cylindrical Waves 323
6.9.2 Equation of Spherical and Cylindrical Waves 324
6.10 Measurements of Sound Levels **324**
6.10.1 Comparison of Loudness Levels 325
6.11 Stationary Waves **327**
6.11.1 Different Equations for a Stationary Wave 329
6.11.2 Velocity and Acceleration of Medium Particle in Stationary Wave 330
6.12 Standing Waves on Clamped String **331**
6.12.1 Normal Modes of Oscillations of a Clamped String 332
6.13 Wave Resonance **333**
6.13.1 Resonance in Clamped String Oscillations 333
6.13.2 Sonometer 334
6.13.3 Vibrations of Composite Strings 335
6.13.4 Melde's Experiment 335
6.13.5 Energy Associated with the Medium Particles in a Stationary Wave on a String 336
6.14 Vibrations of Clamped Rod **336**
6.15 Waves in a Vibrating air Column **344**
6.15.1 Vibration of Air in a Closed Organ Pipe 344
6.15.2 Vibration of Air in Open Organ Pipe 345

6.15.3 Natural Oscillations of Organ Pipes 345
6.15.4 Kundt's Tube 345
6.15.5 Resonance Tube 346
6.15.6 End Correction in Organ Pipes 347
6.16 Beats **353**
6.16.1 Echo 354
6.17 Doppler's Effect **358**
6.17.1 Stationary Source and Stationary Observer 359
6.17.2 Stationary Source and Moving Observer 359
6.17.3 Moving Source and Stationary Observer 359
6.17.4 Moving Source and Moving Observer 360
6.17.5 Doppler Effect in Reflected Sound 360
6.17.6 Doppler's Effect for Accelerated Motion 361
6.17.7 Doppler's Effect when Source and Observer are not in Same Line of Motion 361
6.17.8 Doppler's Effect in Light 361
6.17.9 Applications of Doppler Effect in Light 362
6.18 Shock Waves **367**
6.19 Reflection and Refraction of Waves **369**
6.19.1 Reflection of a Wave Pulse in a Stretched String 370
DISCUSSION QUESTION 371
CONCEPTUAL MCQS SINGLE OPTION CORRECT 373
NUMERICAL MCQS SINGLE OPTIONS CORRECT 376
ADVANCE MCQS WITH ONE OR MORE OPTIONS CORRECT 384
UNSOLVED NUMERICAL PROBLEMS FOR PREPARATION OF NSEP, INPHO & IPHO 387

ANSWERS & SOLUTIONS

Chapter 1 **Heat and Thermal Expansion** 395 - 412
Chapter 2 **Kinetic Theory of Gases and Gas Laws** 413 - 423
Chapter 3 **Thermodynamics Laws & Specific Heats of Gases** 424 - 441
Chapter 4 **Heat Transfer** 442 - 460
Chapter 5 **Oscillation and Simple Harmonic Motion** 461 - 486
Chapter 6 **Waves** 487 - 510
